## Profile

Third-year Software Engineering student at Addis Ababa Science and Technology University, focused on full-stack development and connecting clean frontends to solid backends. Enjoys debugging, personal projects, football, and thinking through system design.

## Technical Background

C++ (object-oriented programming, data structures, file handling, algorithms); Python (scripting and prototyping); MySQL (queries and schema design); HTML, CSS, JavaScript; Node.js and Express (simple REST APIs).

## Selected Projects

| | |
|---|---|
| **Rental House Availability & Price Checker** | C++ project using OOP and file handling. |
| **Smart Study Planner** | HTML, CSS, and JavaScript app for prioritizing study sessions and schedules. |
| **Bus Reservation System** | C++ console app with seat selection, bookings, reservation records, and file handling. |
| **Rental System Database** | Group project; designed MySQL entities, relationships, and queries. |
